OUTDOOR LIGHTING

Hello,
nice to meet you
we are

LUTEC

CONNECTED BY LIGHTING

one LUTEC, one **lighting** world

We think that outdoor lighting is one field with different needs and approaches. Our main challenge, using our experience, is to propose creative solutions to enlighten your outdoor living space.

As LUTEC, we have made this open choice to embrace this field of activity most completely.

Architectural, with wall and ceiling decorative lamps, specific light effects, functional with directional or recessed lights, the garden, the paths and terraces... Entering in the solar lighting is more than trendy, the solar energy being an active part of our future.

Begun recently, the activity related to safety and comfort has gained importance. New connected camera ranges are developed. The world of colour and programming to manage all your lights now enters our collections.

One world, different faces, different segments developed with the same concern of quality and efficiency.

discover what's new

make your outdoor life smarter

LUTEC
connect

LUTEC introduces a range of Outdoor luminaires with the integrated LUTEC connect lighting module. Combining high quality weatherproof aluminium fixtures with endless possibilities to control the powerful LED Light.

Always connected

Fast and stable Bluetooth connection. Thanks to mesh technology you can enjoy the full scalability towards all your outdoor living spaces, also the ones in a more remote position.

Splendid Light

Enhanced by the LUTEC connect dynamic CCT & RGB colour tuning technology. Great light for the great outdoors. It's about freedom without compromise. A light for every mood!

Convenient, Comfortable & Personal

Open the LUTEC connect App, take full control and discover the full smart lighting experience. The optional smart remote control offers the full functionality without internet access in the most convenient and simple way. You can create and program the perfect outdoor atmosphere for every occasion.

a light for every mood

Black is the new grey!

Black is completely back in home decoration. LUTEC offers now a number of existing and new designs in a mat black finish.

New Scandi Inspiration

This trend can be seen all over Europe. Outdoor luminaires with pure and gentle lines in mat black colours, perfectly matching with other black decoration elements around your home and in your garden.

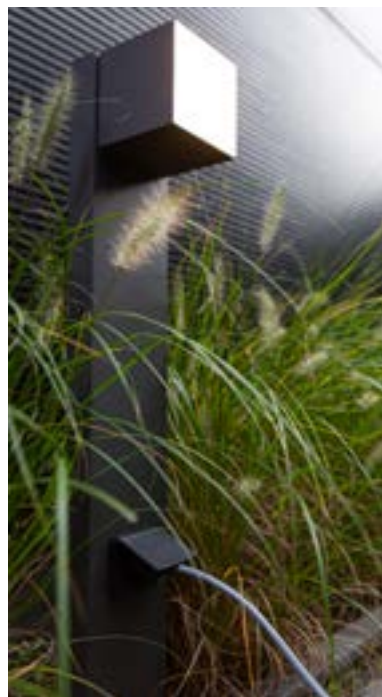

Timeless and versatile

These mat black models are suitable for many different styles of outdoor walls and will give a valuable and uniform impression.

Warm white light at the dark side

The complete series in mat black are equipped with a 3000K - LED module. Giving a warm white diffuse glow or a cosy warm white beam on your outdoor walls.

Never change a winning team!

In the recent years LUTEC has introduced a number of very successful ranges like GEMINI, CUBA, QUBO and HELENA. Today we can present some extra versions of these top families.

Beam your way

The new GEMINI BEAMS model offers a wide variety of different beam patterns, up & down on your outdoor walls. Tuneable with a simple twist of the diaphragm ring.

Size matters XF-S-M-L

A large choice of different sizes will be available, going from small to large, from flat to extra flat. This in square, rectangular and cube models.

Complete your outdoor lighting projects

By introducing these extra versions, you can arrange your complete lighting project with models of a same family. These models will be equipped with some functional and completely integrated elements as a PIR motion sensor and power outdoor socket.

there's a new tradition

Cottage flair around your house, LUTEC further extends their Tradition series with retrofit solution.

IF Design Award 2020 winner

All you need is flair! For sure a nice achievement and testimony to the good design.

Transparent Glasses

Beside the execution with the distinctive water drop glass diffuser, the complete KELSEY family is now also available with clear transparent glasses.

Vintage flair LED filament bulbs

You can apply the newest decorative filament LED bulbs, these lamps are now available in all forms & shades. The connected & tuneable models will facilitate the full control of the lights at your personal desire. A warm amber glow turns your garden into a cosy & charming environment.

solar? yes, please!

LUTEC has a variety of different concepts covering the complete solar energy field. Recently some new attractive and compact Solar outdoor LED Lights were launched in the market.

Compact, Cute and Convenient

New in the integrated solar panel wall light offer are the models DOBLO and TRY, both featuring a power full light output of 500 lumen and extra dimming function switch.

"You are my little sunshine"

New compact version of the well known SUNSHINE solar flood light range. Now also available in a small but powerfull version. Ideal for multiple use to cover different areas in your garden, driveway and carpark.

connected light

make your outdoor life smarter

CONNECTED LIGHT is now already the future for all your lighting applications in the garden and around your home.

The new **LUTEC connect** range offers a wide variety of outdoor luminaires with a fast and stable Bluetooth mesh connection, suitable for distant installations in your garden. Enjoy the full smart lighting experience, just by opening the LUTEC App. For instant in the room control, you will appreciate the convenience of the LUTEC Remote Control.

The existing **TUYA powered** ranges are fully compatible with the **LUTEC connect** ecosystem. CCT control from Warm White to Cool White with a simple move on your smartphone. Convenient and creating the desired tuneable light.

architectural

ARCHITECTURAL applies to all lighting installations for homes, terraces and gardens covering a contemporary and modern design. LED's have drastically influenced the creation of new lighting products. Need for efficiency but also for harmonious integration when using one or several products : wall, bollards, ceiling and bulkhead designs. The offer is responding to architectural variety, location and living contexts. A good match can be found in between the luminaire and the architectural elements, in form, colour or material.

solar? yes, please!

SOLAR covers a variety of different concepts in the field of renewable energy lighting solutions.

The portable range illustrates light mobility, pleasant and ubiquitous to use. The wall lights and bollards are built following two principles, using an integrated or independent solar panel, quick and easy to install.

Today the highly efficient solar panel in combination with powerful LED modules are giving a really satisfactory light level. Making the most out of the available solar energy is cleverly realised by intelligent user interfaces such as 3-step dimmers, timers and PIR-sensors.

complete lighting solution: green & convenient

 Solar Energy, no electricity consumption	 Full comfort Autonomy all night long	 Portable
 No electrical wiring, no connection to the mains	 Clever & multiple control options	 Integrated solar panel
 Powerful LED Light	 Easy and fast installation	 Separate Solar panel

nice to know

Longer light or more powerful light

High efficiency monocrystalline or polycrystalline solarpanel

LED module with strong light output: 100 lumen up to 500 lumen

Li-ion rechargeable battery included

Integrated dusk to dawn sensor, automatic switch to light-on during night

Weatherproof materials and finishing

how to choose

solar panel Integrated

Compact, no extra wiring

Separate

Higher solar energy capacity

orientation of solar panel Fixed

The luminaire should be placed in the most optimal position; south orientation

Adjustable

The panel can be oriented in the most efficient position; south orientation (tilt angle 35° in summer - 65° in winter)

orientation of LED light Fixed

Diffuse light - Up & down light

Adjustable

Directional spotlight

clever control PIR motion sensor

Smart use of the available solar energy
Always light when somebody is passing

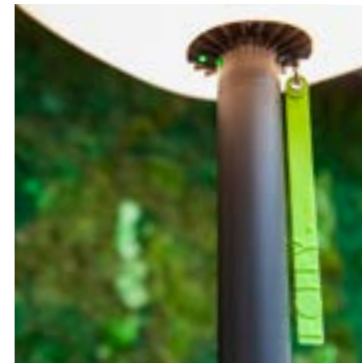

High-Medium-Low switch

Personalized choice to come to ideal combination of light output and autonomy

DIM

The Light stays in low brightness all night and turns to high brightness when it detects motion.

CAMERA LIGHT
connected security concept

always connected with your home

As market initiator LUTEC is proud to present the 2nd generation of the connected camera range.

This brand new range has been developed based on learning and consumer insights over the last 3 years and by applying the gains and innovations of the fast evolving connected technology.

This has resulted in a limited range of compact and very convenient camera lighting fixtures, ready to install or to make a swift replacement of your actual outdoor luminaires.

Powerful and bright light with the dimmable LED module

Sharp HD video recording with wide angle light sensitive lens

Built-in noise cancelling microphone with 2-way speaker buzzer

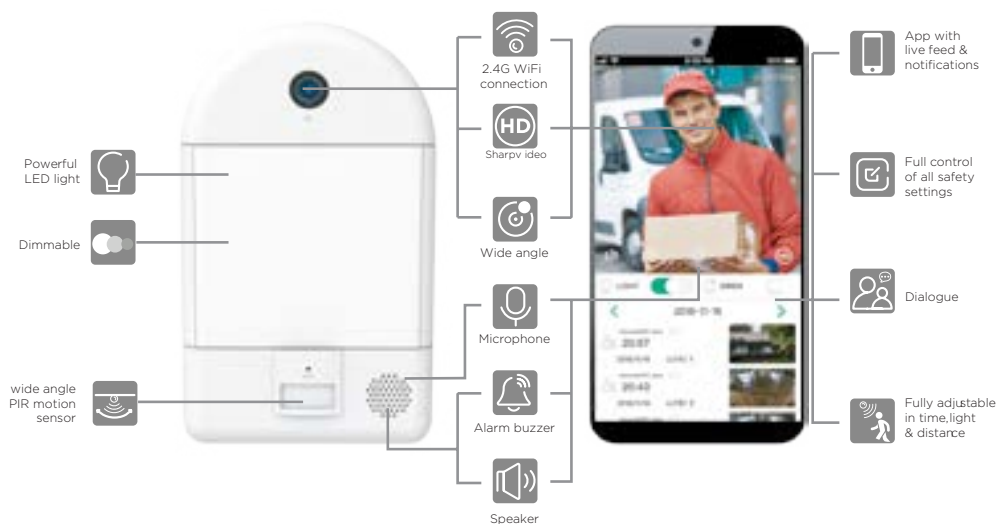

Infra-red motion sensor fully adjustable in time, distance and light mode.

App with live notifications and video feed. Full control on all settings

WiFi connection
Secured Cloud Data Storage
Voice Control

install

InMotion

Security Sensor Light

security for your **comFort**

LUTEC launches the InMotion concept offering a complete range of Security Sensor Lights.

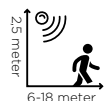

The range is featuring now, besides the powerful flood lights with one or two heads, a number of very elegant designs which make a perfect match with the architecture of your house. The 2 stand-alone PIR sensors with multiple controls make the range complete.

Passive infrared (PIR) motion sensor

How does it work?

A PIR sensor detects changes in the amount of infrared radiation and converts this changes into a switch-on signal.

When a person makes a movement within the detection reach, the sensor will detect a difference in infrared radiation in between the person's body and the environment.

Comfortable detection area

The detection area is a combination of the reach in distance and angle. An adjustable sensor can be tilted and/or turned and gives you full freedom.

Your personal settings

Time setting

As from the moment the sensor detects a movement the light stay on from 10 seconds upon 8 minutes according your preference.

Twilight setting

The environment brightness can be adjusted according your selection from night (10 lux) to daylight. In this way the light will switch into the "ON" position according the selected outside light level and not during the day.

Distance setting

You can limit the detection distance in accordance with the desired detection area. In this way you can avoid a movement detection outside your private grounds.

For your convenience

Dusk to dawn

Automatic light on switching as soon it's dark outside

Ambient Light

Light stays on all night long in a gentle ambient light, after movement detection the light switches on a powerful light beam.

Double sensor

Assures you a full detection not only frontal but also underneath the luminaire close to the wall.

Test mode

You can define the perfect detection area during installation in daylight situation

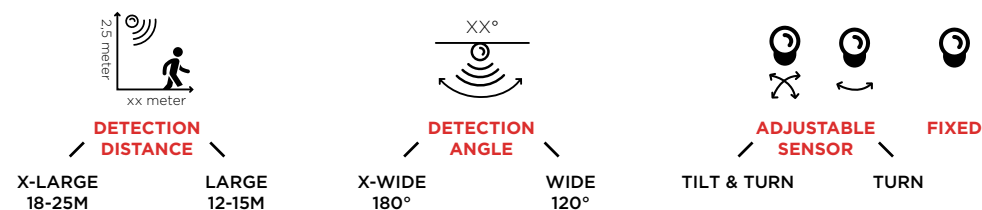

How to choose?

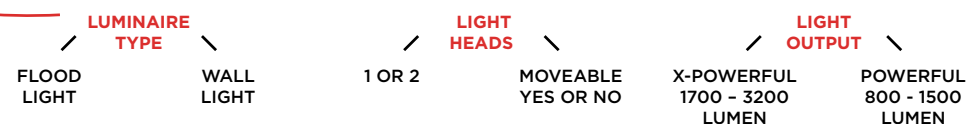

Check in a few steps which InMotion Security Sensor Light suits the best for your home situation.

introducing our company

40 years of experience

The beginnings of a lighting company

Originally set up as a national aluminium die-cast factory, we gained our first experience of outdoor lighting by producing bulkhead lights & classical garden lanterns. Our quality standards have always met international standards and the first export shipment was made in 1996. The new factory in Yuyao became operational in 2001, concentrating on modern garden & professional lighting resulting from a booming international demand. From 2009 a close collaboration with the Design(Pool) had two objectives; to create a stronger offer for the ODM market and to develop a platform for our own brand of lighting. LUTEC was launched in 2010, focusing on architectural LED lighting and the introduction Solar Energy Products. The success of the company resulted in the opening of a second production facility in 2012, fully devoted to future developments in design and new technologies.

Whilst it is true. LUTEC is a young brand, it is built on a strong manufacturing background (40 years of experience) and a solid reputation of technological expertise. Manufacturing involves imagination and efficiency.

Why we decided to establish a brand?

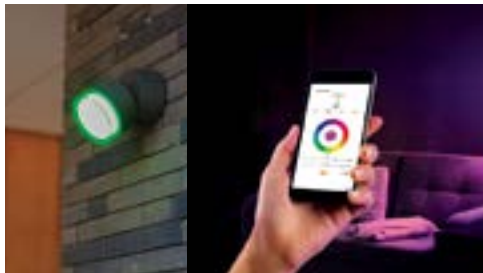

The brand gives us a needed visibility. The brand allows us to anticipate the market, to make our own choices related to trends and to make developments such as we perceive them through our partners in different countries. Connected by lighting underlines our intention to develop products in accordance with the final consumers, through all our network and distribution channels. Having become a major player in the lighting field, our main objective is to consolidate our offer through creativity, our designs evolve and involve the highest level of quality and services.

Nowadays Lighting is both essential and magic.

The challenge of lighting market is to create products which are a balance between the shape, impact and attractiveness however, they must also provide real functional values. The LED revolution has completely changed the game, giving many new opportunities. Added to this we must not only continue to offer the latest technical innovations but also anticipate and provoke them, especially with solar energy and smart lighting controls. To serve our objectives, we have continued to expand our international network and organisation: with new central warehouses in Belgium and China, establishing partners in many new countries allowing us to continue building our corporate identity and providing our partners with unique product support and marketing.

Future is already here Support the users

Today we are all surrounded by the interactive and connected World. For many reasons it is evident that the lighting market must also embrace this new internet age. The need to control our lighting, at will, from afar and to suit our environment is a must have feature. Temperature, color, dimming, activity sensors and timing controls are the norm. Programmable solutions for energy saving, interactivity between multiple light points or installations are becoming standard. Security options with camera vision, live video and recording are no longer a futuristic dream as LUTEC products can perform all of the above.

welcome to the lutec center

connected by lighting

The LUTEC centre is in our HQ in Yuyao and located on our production site, it is an International meeting venue where new concepts, innovation & strategies are studied then created and shared, with our partners.

We provide an expert platform in design, sales and services. We have the will to show and experiment different approaches creating choices for the short or medium terms. Staying close to our customers, which by extension also means the final consumers, allows the right design solutions to be found. Our team is trained to be proactive and reactive. The key to realise a win-win product is to always explore the possibilities, look outside the box to find the best solution.

In our view innovation is always closely linked to a right level of realization.

design & engineering

design, engineering & manuFacturing, all interactive.

One of the main decision we have taken in the LUTEC organisation is to break down the walls between of each department to improve product strategy. This brings a culture of flowing communication between the services where everybody has a positive role to play in all projects. It works because we consider that we are all concerned in the success of a product.

We all know development is complex with many obstacles to overcome however by working together helps our team to aim for the perfect solution as smoothly as possible. Knowledge is shared at all levels. Creativity, marketing, engineering, production, and sales are all one, this method improves time to market significantly.

reddot award 2019
winner

warehousing & transport

global logistic Footprint assuring availability & proximity.

Unlike many manufacturers in this sector, LUTEC keep significant levels of completed stock which is packaged and ready to ship. This is in addition to our stock process flow, feeding our satellite distribution centres in Europe and elsewhere around the World. Our aim is to reduce the lead time wherever possible on key products.

CCW

China Central
Warehouse
Yuyao - China

ECW

European Central
Warehouse
Bornem - Belgium

Since 2014, the European Central Warehouse is fully operational. This warehouse located in Belgium, centrally situated in Europe with an average lead time of 7 days for most shipments within Europe, LUTEC products are always within reasonable reach.

We offer different transport options: direct shipment, cross docking or pick-up, in co-operation with each territory. The ECW product portfolio now contains 300 sku's.

Now, we've also the possibility to assure different value adding trade marketing services in the ECW.

LUTEC quality

As a global supplier, our products are fully compliant with all relevant technical & quality requirements of the different regions in the world.

All LUTEC LED products benefit from a 5-years functional warranty. For the SOLAR range we apply a standard 2-years operational warranty.

Subject to conditions, please see our website.
www.lutec.com/warranty

Integrated LED Light-engines

In the majority of our ranges we use dedicated LED light engines. The LUTEC in-house engineering/production departments only use primary component suppliers, constantly improving the performance of the total LED product, resulting in a higher lumen/watt ratio as well as increasing levels of lumen/monetary ratio.

Low Energy Cost: LUTEC products offer at least an 80% saving compared to traditional sources
Long Lifetime: up to 20.000 hours

LUTEC LED-light engines featuring the most appropriate characteristics in order to give the best result for all your outdoor applications.

- Lumen Maintenance: 100% LM-80 test report
- Color deviation: 100% under 5-step MacAdam ellipse
- ERP compliant

The LED driver is the heart of the LED module and is the main influencer of the life-time. LUTEC develops these drivers to the specification of the product for best performance. The production of the SMD's used in the LUTEC-drivers is done in-house in our approved SMT assembly lines. All drivers are compliant to all relevant standard and regulations.

Lextar

The **Light Color** or **Color Temperature** in Kelvin (K) gives a clear indication about "whiteness" of the LED light.

Standard we apply the 4000K Daylight. For most fixtures with diffuse light and vintage look a 3000K Warm White light is installed. The more functional work & security projectors have an integrated LED source with a 5000K Cool White light.

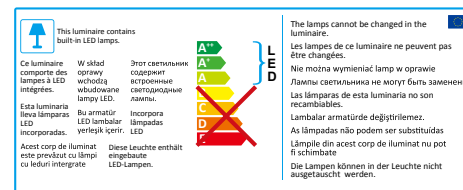

The **Color Rendering Index (CRI)** gives on a 0-100 scale an indication the color accuracy. Determining the ability of the light source to reveal the colors of the object faithfully in comparison with a natural light source. In all LUTEC fixtures we apply a CRI of minimum 80%. For outdoor applications this is an ideal level.

The **Luminous Flux** of an Outdoor fixture indicated by number of Lumen. (lm) is the total amount of light which comes out of the fixture in all directions. It gives a good measure of the brightness you can expect. This Lumen indication is a better way to describe the level of illumination as opposed to wattage.

The **Luminous Efficacy** in Lumens/Watt gives a good measure of the optimal conversion of the electrical power into useful light. This is an important parameter with direct impact on the electric energy cost for your installation. Thanks to the continuous developments the LED solution is already today one of the most efficient light technologies. The Luminous Efficacy is one of the main parameters for the determination of the Energy Efficiency class.

Actual Situation

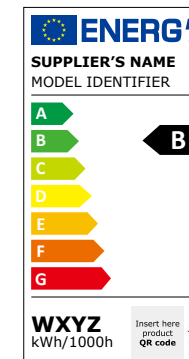

According the EU regulation no 874/2012, for energy labelling of electrical lamps and luminaires, requires manufacturers to inform consumers of the Energy Efficiency class. LUTEC LED-fixtures are rated at a minimum **Energy Efficiency class of A+** or higher, further information is available on our website; www.lutec.com.

New EEL Regulation

A new EU regulation concerning Energy efficiency for lighting products will be applied as from September 2021. It involves a New Energy Labelling regulation (EU) 2019/2015 and New Ecodesign requirements for light sources. (EU) 2019/2020

All LUTEC luminaires will be updated in the first half of 2021 in order to be fully compliant to the new regulations and in line with the confirmed transfer timings.

materials & finishes

LUTEC exterior products are produced using high quality materials and finishes with excellent weather protection properties as well as mechanical strength to ensure a long lifetime.

Heavy duty die-cast Aluminum (ADC 12) with a thickness of 2mm, is in most cases the preferred material, our process ensure no air holes. The LUTEC In-house fully automatic powder-coating & water painting installation provides excellent protection against corrosion.

LUTEC benefits from an in-house tooling workshop for both aluminum and synthetic components. This facility provides us with high quality production especially where premium Stainless Steel is used, typically in ground recessed spotlights using grade 304 & 316 steel. For the wall & bollards: 201 & 202 is utilised with an electrophoretic paint, resulting in an additional layer of protection.

Different kind of durable synthetics, depending on the application and form factors. For the fixtures: in most cases ABS, this is a strong, light-weighted material and can be used under low and high outdoor temperatures. For the diffusers: the impact proof and very resistant PC (polycarbonate) is used in opal or transparent version. Also clear glass, tempered glass and opal or clear PMMA (plexi-glass) are common in our designs.

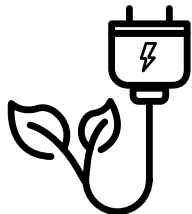

IP rating table

	Protection against solids		Protection against liquids
0	Not Protected	0	Not Protected
1	Protected against Solid Objects greater than 50mm	1	Protected against Dripping Water
2	Protected against Solid Objects greater than 12mm	2	Protected against Dripping Water when tilted to 15°
3	Protected against Solid Objects greater than 2.5mm	3	Protected against Spraying Water
4	Protected against Solid Objects greater than 1mm	4	Protected against Splashing Water
5	Dust Protected	5	Protected against Water Jets
6	Dust Tight	6	Protected against Heavy Seas
		7	Protected against the effects of Immersion
		8	Protected against Submersion

The LUTEC Outdoor fixture comply to the International standards concerning Ingress Protection. All articles have a minimum IP44 rate. For some specific applications (Ex. in ground recessed spots) the protection rate goes up to IP67.

Sustainable vision

LUTEC constantly strives to reduce the impact of manufacturing on the environment, our intention to become a wholly sustainable company by continually improving our processes. All our designs start from a sustainable mindset, offering our customers low energy consumption LED- solutions or fully energy neutral SOLAR energy alternatives.

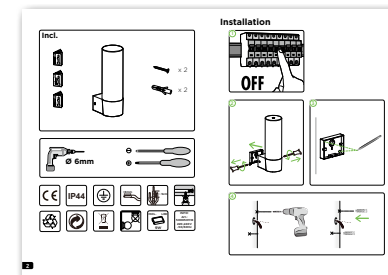

mounting, installation & maintenance

Instruction Manual

LUTEC pays a lot of attention to a user friendly and effective yet simple instructions, we strive to find time saving methods of installation using uniquely designed interfaces where possible. Every LUTEC Outdoor fixture has a clear instruction manual in the unit box and this manual can also be downloaded from our website.

Service network

Our service network is available on global level through our LUTEC Partners. Contact details: www.lutec.com/services/global-network

LUTEC brand identity

packaging

The LUTEC corporate identity has been revamped in line with our evolving brand values. New trade support tools and POS have been created to support our products and our customers providing an integrated selling solution, all of which adds value and distinguishes the LUTEC offer from our competitors.

Recently we introduced the fully refreshed packaging, being applied to our complete portfolio. We believe the new look of the new packaging is fresh, vivid and in tune with our style of products.

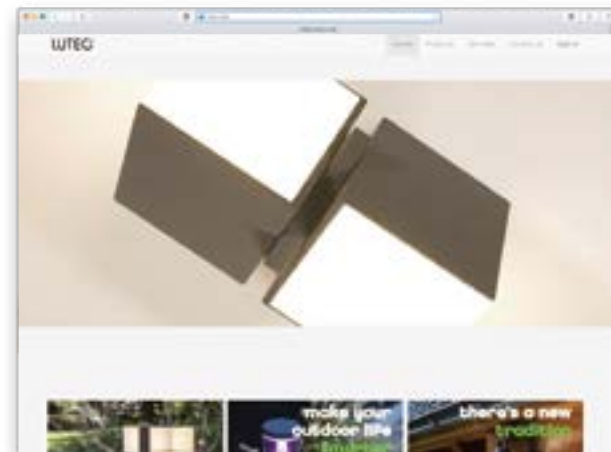

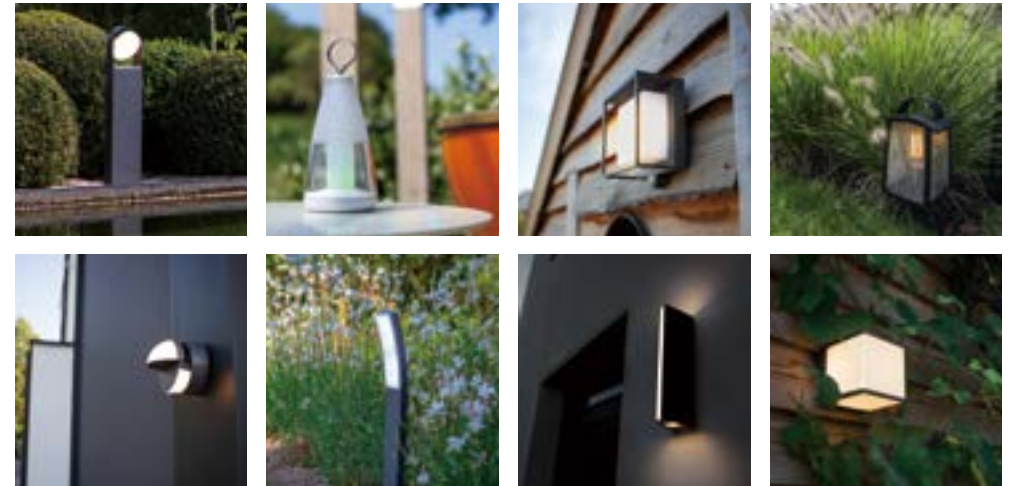

The product is always the hero with a inspiring photography. The refreshed LUTEC logo is visible from all sides of the packaging which together with the green banner this will further improve the brand recognition. The most relevant characteristics (lifestyle) are shown on the front facia, top and second side, this is combined with an in situation image. The lifestyle image on the front is repeated on the third side and creates the right atmosphere for each product style. The rear of the carton contains comprehensive technical information utilising innovative graphic icons. The EEL label and the short description translation in 8 languages makes the information complete.

LUTEC brand identity

rich content

We're constantly creating new communication materials to support and improve the presentation of LUTEC products, allowing ease of selection. All support materials are accessible through our refreshed website www.lutec.com. Where you can find the LUTEC database with all kind of "rich content": product photos, Lifestyle photo's, Tutorials, Inspirational video's, Flash-Intro video's, Unpacking experiences, etc.

All support materials may be used for numerous marketing initiatives such as driving traffic to your own landing pages on your websites via social media. Content can be created in a convenient and attractive way resulting dynamic information and content to inform and inspire the customers about the LUTEC products.

LUTEC brand identity

in-store support

Based on consumer insights and specific requests from our customers, we're proposing a large number of in store support tools.

Always starting from the same idea: the product - proposition is king, the customer should be guided in a clear way facilitating clear product selection in a convenient way. Together with the refreshed look & feel to the LUTEC brand communication, we have adopted an inspiring and convincing communication for the various product segments.
