MODERN & CLASSIC

Funcțional și decorativ, **iluminatul de exterior** este un generos teren de joacă pentru creativitate. Klausen vă oferă toate instrumentele necesare unui iluminat de efect, în stil **clasic** sau **modern**, potrivite locuinței dvs.

Imaginați-vă iluminatul de exterior ca o orchestră – diferite instrumente, sonorități, intensități creează o experiență unică și emoționantă. Doar că, în cazul corpurilor de iluminat, vorbim despre un joc subtil de lumini și umbre care dezvăluie, reliefează sau ascund detaliile. Elementele de bază ale acestui joc sunt corpurile pentru **iluminat ambiental** (aplice, spoturi, suspensii, stâlpi), de **accent** (corpuri încastrate sau aplice care pun în valoare anumite detalii) și pentru **iluminat funcțional** (pentru alei, trepte, etc).

Iluminarea de jos în sus a vegetației creează efecte spectaculoase, prin utilizarea corpurilor de **iluminat de accent**. În schimb, iluminarea de sus în jos este subtilă și oferă o atmosferă caldă, primitoare. Cele două tipuri de iluminat pot fi folosite împreună, pentru o zonă de vegetație, sau pot fi utilizate separat.

Alegerea **temperaturii de culoare** se face atât în funcție de **suprafața** pe care doriți să o evidențiați – lumină caldă (2700-3000 K) pentru lemn, zidărie aparentă sau vegetație, respectiv lumină neutră sau rece (4000-7000 K) pentru elemente de beton, cât și în funcție de **atmosfera** pe care doriți să o creați – romantismul este asociat unei lumini calde, în timp ce un vibe modern, urban, se obține cu ajutorul luminii reci.

Functional and decorative, **outdoor lighting** is a generous playground for creativity. Klausen offers all the instruments for an attractive lighting, in a **classical** or **modern** style, suitable to your house.

Imagine outdoor lighting like an orchestra – various instruments, sonorities, intensities create a unique, emotional experience. Just like that, with lighting, we are talking about a subtle game of light and shadow that reveals, accentuates or hides details. The basics of this game are **ambiental lighting** (wall lights, spotlights, pendants, poles), **accent lighting** (in-ground lights, wall lights that highlight certain details) and **task lighting** (for pathways, steps, etc).

Uplighting vegetation creates spectacular effects, with **accent lighting** products. On the other hand, **downlighting** is subtle and creates a welcoming atmosphere. The two types of lighting can be used together in a landscape area, or separately.

The **color temperature** can be chosen depending on the **surface** you intend to lit: warm light (2700-3000 K) for wood, bricks and vegetation, or neutral (daylight)/cold light (4000-7000 K) for concrete walls, as well as according to the **mood** you want to set: warm light for a touch of romance, or cold light for a modern, urban vibe.

Iluminatul decorativ este o tehnică prin care se creează jocuri de lumini cu ajutorul unor fascicule cu unghiuri și direcții diferite (ex: Ambiance, Letter, Modern, Spot, etc). În funcție de tipul de corp, se potrivește pentru clădiri moderne sau clasice.

Iluminatul de accent utilizează corpuri cu fascicul direcțional pentru a evidenția elemente interesante de arhitectură sau vegetație (Point, Riad).

Decorative lighting is a technique that creates light effects using adjustable beams and various lighting directions (ex: Ambiance, Letter, Modern, Spot, etc).

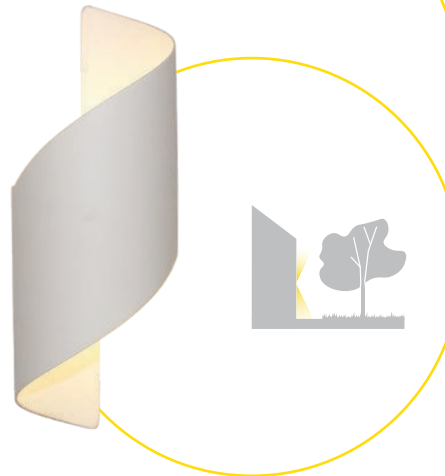

Depending on the type of luminaire, decorative lighting is suitable either for modern or classical buildings.

Accent lighting uses directional beams to highlight interesting architectural or landscape elements (Point, Riad).

RIAD 4S2

Iluminarea aleilor se realizează cu ajutorul corpurilor încastate, a aplicelor montate pe balustrade sau a stâlpilor de diferite dimensiuni (Riad, Quebec, Delta 2, Kora, Spokane, Baltimore, etc). O variantă eficientă energetic e reprezentată de corpurile de iluminat cu **senzor**. Se recomandă surse de iluminat **LED**.

Pathway lighting uses in-ground fixtures, wall lights mounted on railings, or poles of various heights (Riad, Quebec, Delta 2, Kora, Spokane, Baltimore, etc). For energy efficiency, we recommend using lighting fixtures with **motion sensors** and **LED** bulbs.

FEISS 2

Alegerea puterii și a fluxului luminos (număr de lumeni) pentru corpurile de iluminat se realizează în funcție de dimensiunea spațiului, numărul de surse și de corpuri. În general se recomandă utilizarea unor corpuri LED cu flux luminos între 400 și 750 lumens (Eclipse, Letter, etc), pentru a crea efecte subtile și atractive. Pentru zona de **intrare în locuință** și pentru spațiile unde **siguranța** este foarte importantă (trepte, acces la garaj), sunt necesare lumini mai puternice, cu flux luminos de peste 700 lumens.

The correct **power and luminous flux** for the lighting fixtures is chosen according to the size of the space, the number of light sources and fixtures. We recommend LED lighting fixtures with a luminous flux between 400 and 750 lumens (Eclipse, Letter, etc), to create attractive and subtle effects. For the building **entrance** and areas where **safety** is very important (steps, garage entrance), stronger lights should be used (over 700 lumens).

NUVOLA 3

Illuminatul general este o tehnică ce creează un efect subtil, pe o suprafață mare, folosind o luminozitate eventual mai redusă și corpuri montate aproape de structura iluminată. Similar, pentru grădină, ne referim la **iluminatul ambiental**. Se recomandă corpuri ca: Quebec, Ossett, Cesya, Toffi, Ascot, Koss, Derby, Tolson, etc.

Wall washing creates subtle effects, on a large surface, using maybe a lower amount of light, up close to the structure, with minimal hot-spots and density. Similarly, for gardens (landscaping) there is **ambiental lighting**. Lighting fixtures recommended for this purpose are: Quebec, Ossett, Cesya, Toffi, Ascot, Koss, Derby, Tolson, etc.

SPOKANE 3

Pentru **iluminarea clădirii**, pe lângă designul dorit, pus în valoare cu spoturi sau corpuri de iluminat cu fascicule decorative, este important să luați în considerare câteva aspecte de ordin tehnic. În primul rând, este necesară alegerea unor corpuri de iluminat pentru **intrarea în locuință** (aplice, montate la 1,8m față de podea sau la nivelul treimii superioare a ușii de intrare, plafoniere sau suspensii), **garaj, căi de acces, trepte și poartă** (Norwich, Blaze, Power, Boston, etc). Recomandăm utilizarea unor surse de iluminat **LED**, pentru eficiență energetică. Toate corpurile pentru exterior expuse direct factorilor naturali trebuie să aibă protecție la umiditate și praf, respectiv **minim IP 44**. Elementele interesante ale clădirii, cum ar fi textura de piatră, stucaturi, ancadramente de ferestre pot fi evidențiate cu ajutorul **iluminatului arhitectural sau de accent** (Expert, Riad, Spot).

For **building illumination**, besides the design to be achieved (with spotlights or other decorative lighting fixtures), some technical elements need to be considered. First, you should select the fixtures for the **building entrance** (wall lights, installed at 1.8m from the ground or aligned at the top third of the door, ceiling lamps or pendants), **garage, pathways, steps and gate** (Norwich, Blaze, Power, Boston, etc). We recommend using **LED** bulbs for energy efficiency. All the exterior lighting fixtures directly exposed to environmental conditions should have superior insulation: **IP minimum 44**.

The interesting accents of the building, like rock texture, stucco, window frames can be highlighted through **wall grazing or accent lighting** (Expert, Riad, Spot).

PETROL 10

Copacii pot fi iluminați de jos în sus, cu ajutorul unor **corpuri încastrate sau la nivelul solului,** iar tipul și numărul de corpuri necesare se determină în funcție de dimensiunea copacului și de forma acestuia (pentru foioase se recomandă corpuri cu fascicule de 35°, iar pentru conifere, de 60°).

O variantă care va adăuga romantism grădinii dvs. constă în amplasarea între crengile copacului a unor corpuri de iluminat cu fascicul de 60°, **directionate în jos.**

Pentru rocării, ierburi sau pietre decorative se recomandă utilizarea corpurilor de iluminat încastrate/joase (Point, Riad 1S/2S, Tolson 2S, Boston, etc).

Uplighting, with in-ground fixtures or small poles is suitable for trees, depending on their size and shape (deciduous: 35° beam, firs: 60° beam).

For a romantic atmosphere in your garden, you can install 60° **downlights** in the canopy.

For stones, cacti, grasses used in xeriscape designs we recommend using in-ground/short fixtures (Point, Riad 1S/2S, Tolson 2S, Boston, etc).

Toate produsele și corpurile de iluminat comercializate de SC Klausen Exim SRL sunt marcate CE și respectă directivele specifice: 73/25 CEE și 93/68 CEE cu privire la siguranță, directivele 89/336 CEE și 93/68 CEE cu privire la compatibilitate electromagnetică.

Produsele comercializate de SC Klausen Exim SRL respectă Directiva Europeană 2002/95/EC cu privire la toate echipamentele electrice și electronice vândute în țările membre ale Uniunii Europene după 01.07.2006. Scopul directivei este cel de a limita folosirea unor substanțe periculoase în echipamente și de a stabili un sistem de prevenire și gestiune a unor astfel de reziduuri, favorizând recuperarea, reciclarea și colectarea diferențiată.

Fotografiile, dimensiunile și culorile produselor prezentate în acest catalog sunt doar cu titlu informativ. Sunt posibile diferențe de model/culoare. Ne rezervăm dreptul de a modifica produsele. Reproducerea parțială sau totală a acestui catalog este interzisă fără permisiunea Klausen Exim. Toate drepturile sunt rezervate.

Pentru eventualele greșeli de tipar, ne cerem scuze.

All products and lighting fixtures sold by SC Klausen Exim SRL are CE marked and comply with the specific directives: 73/25 EEC and 93/68 EEC on safety, directives 89/336 EEC and 93/68 EEC on electromagnetic compatibility.

The products sold by SC Klausen Exim SRL comply with the European Directive 2002/95 / EC on all electrical and electronic equipment sold in the member states of the European Union after July 1st, 2006.

The purpose of the directive is to limit the use of hazardous substances in equipment and to establish a system for the prevention and management of such residues, favoring recovery, recycling and separate collection.

The products photos, sizes and colors shown in this catalog are just for presentation. Model / color variation is possible. We reserve the right to change the products. Partial or total reproduction of this catalog is forbidden without the express consent of Klausen Exim. All rights reserved.

We apologize for any misprints.

LEGENDĂ/KEY OF SYMBOLS

Sistemul certifică conformitatea corpului de iluminat cu standardele europene SREN 60598
The system certifies the luminaire's compliance with the European standards SREN 60598

Tip dulie
Lampholder type

H/L/W/Ø

Înălțime/ Lățime/ Adâncime/ Diametru
Height / Length / Width / Diameter

Becul nu este inclus
Light bulb not included

Recomandat montajul în spații cu posibilitate de aprindere.
Materialele trebuie să aibă o temperatură de aprindere mai mare de 200°C.
Recommended mounting in spaces with possibility of ignition.
Materials must have an ignition temperature higher than 200°C.

Aparatul necesită împământare
The device requires grounding

Izolație dublă sau întărită, aparatul nu necesită împământare.
Double or reinforced insulation, the appliance does not require grounding.

LED

Produs echipat cu LED
Product equipped with LED

Aceste produse au 5 ani garanție
These products have 5 years warranty

Aceste produse au 2 ani garanție
These products have 2 years warranty

Tensiunea de alimentare la toate produsele este între
220-240V ~ 50Hz
Supply voltage for all products is between
220-240V ~ 50Hz

G/F/E

Clasele energetice, conform noilor reglementări, pentru corpuri de iluminat cu sursa inclusă și care nu poate fi înlocuită fără distrugerea corpului, sunt de la A la G. Litera indică încadrarea produsului într-o clasă energetică.
The new energy label, according to the new regulations, concerns luminaires where the light source cannot be removed without destroying it, and ranges from A to G. The letter indicates the product's energy class.

SEMNIFICAȚIA GRADELOR DE PROTECȚIE/IP.. PROTECTION DEGREE

Protecția corpurilor de iluminat la pătrunderea particulelor solide și a umidității este exprimată în grade IP. Prima cifră corespunde gradului de protecție la particule solide, a doua la protecția împotriva apei/umidității, conform datelor de mai jos:

Prima cifră IP/First IP figure:

IP 2_

Protejat contra pătrunderii corpurilor solide mai mari de 12 mm.
Protected against the entry of solid bodies larger than 12 mm.

IP 4_

Protejat contra pătrunderii corpurilor solide mai mari de 1 mm.
Protected against the entry of solid bodies larger than 1 mm.

IP 5_

Protejat contra pătrunderii prafului fără presiune.
Protected against the entry of dust.

IP 6_

Protejat total contra pătrunderii prafului.
Completely protected against the entry of dust.

The protection of lighting fixtures against solid bodies and humidity is shown by IP degrees. The first number corresponds to protection against the entry of solid bodies, the second figure shows the protection degree against water/humidity. Please consult the information below:

A doua cifră IP/Second IP figure:

IP _1

Protejat la picăturile de apă care cad vertical (condens).
Protected against the vertical falling of water drops (condensation).

IP _3

Protejat împotriva apei, cu unghi de cădere de maximum 60°.
Protected against the falling of water with maximum inclination of 60°.

IP _4

Protejat contra stropilor de apă care ajung din orice direcție.
Protected against water drops from all directions.

IP _5

Protejat împotriva jeturilor de apă din toate direcțiile, cu presiune egală cu 0,3 bari.
Protected against water jets from all directions, with pressure of 0,3 bar.
