# HYBRID SOLAR

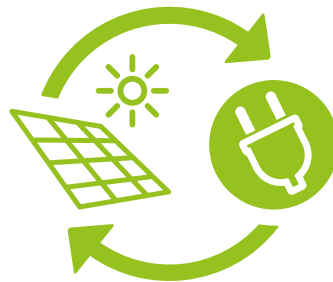

## Die innovative Kombination aus sauberer Solarenergie und Netz- oder Akkubetrieb

## The innovative combination of clean solar energy and mains or battery operation

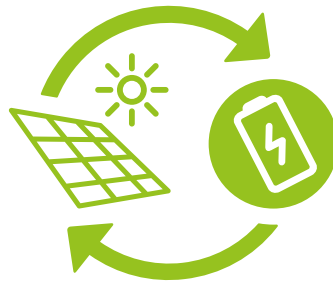

- ✓ 100% Stromkostensparnis während des Solar-Betriebs
- ✓ Sehr hohe Leuchtkraft
- ✓ Hocheffiziente Solarmodule
- ✓ Bewegungsmelder und Dämmerungssensoren sorgen für eine effiziente Nutzung des Solarstroms und mehr Sicherheit
- ✓ 100% electricity cost savings during solar operation
- ✓ Very high luminosity
- ✓ Highly efficient solar modules
- ✓ Motion detectors and twilight sensors ensure efficient use of solar power and more safety

Hybride Solarleuchten tanken tagsüber Sonnenenergie und sorgen nachts für helles Licht. An trübem Tagen, wenn die Sonne mal nicht scheint und die Solarladung zur Neige geht, verbindet sich die Leuchte automatisch mit dem Stromnetz, um mit voller Kapazität weiterzuarbeiten.

Hybrid solar lights charge up with solar energy during the day and provide bright light at night. On cloudy days, when the sun is not shining and the solar charge is running low, the light automatically connects to the power grid to continue working at full capacity.

Bei schwacher Solarladung lässt sich die Leuchte in wenigen Stunden über die eingebaute USB-Funktion mühelos aufladen. Das garantiert konstante Lichtleistung und maximale Effizienz.

If the solar charge is low, the light can be easily recharged in just a few hours using the built-in USB function. This guarantees constant light output and maximum efficiency.

**DE**  
Hybrid solar lights charge up with solar energy during the day and provide bright light at night. On cloudy days, when the sun is not shining and the solar charge is running low, the light automatically connects to the power grid to continue working at full capacity.

**NL**  
Hybride solarlampen laden overdag op met zonne-energie en geven 's nachts helder licht. Op bewolkte dagen, als de zon niet schijnt en de zonnelading laag is, maakt de lamp automatisch verbinding met het elektriciteitsnet om op volle capaciteit te blijven werken.

**IT**  
Le lampade solari ibride si ricaricano con l'energia solare durante il giorno e forniscono una luce brillante di notte. Nelle giornate nuvolose, quando il sole non splende e la carica solare è bassa, la lampada si collega automaticamente alla rete elettrica per continuare a funzionare a pieno regime.

**FI**  
Hybridiaurinkolamput latautuvat aurinkoenergialla päivällä ja antavat loistavaa valoa yöllä. Pilvisenä päivänä, kun aurinko ei paista ja aurinkolataus on vähissä, lamppu kytkeytyy automaattisesti verkkoon jatkaakseen toimintaansa täydellä teholla.

**DE**  
If the solar charge is low, the light can be easily recharged in just a few hours using the built-in USB function. This guarantees constant light output and maximum efficiency.

**NL**  
Als de zonne-energie bijna leeg is, kan de lamp eenvoudig in een paar uur worden opgeladen met de ingebouwde USB-functie. Dit garandeert een constante lichtopbrengst en maximale efficiëntie.

**IT**  
Se la carica solare è bassa, la luce può essere facilmente ricaricata in poche ore utilizzando la funzione USB integrata. Questo garantisce un'emissione luminosa costante e la massima efficienza.

**FI**  
Jos aurinkolataus on vähissä, valo voidaan ladata helposti muutamassa tunnissa sisäänrakennetun USB-toiminnon avulla. Tämä takaa tasaisen valotehon ja maksimaalisen tehokkuuden.

**DE**  
Hybride Solarleuchten tanken tagsüber Sonnenenergie und sorgen nachts für helles Licht. An trüben Tagen, wenn die Sonne mal nicht scheint und die Solarladung zur Neige geht, verbindet sich die Leuchte automatisch mit dem Stromnetz, um mit voller Kapazität weiterzuarbeiten.

**FR**  
Les lampes solaires hybrides se rechargent à l'énergie solaire pendant la journée et fournissent une lumière brillante la nuit. Par temps nuageux, lorsque le soleil ne brille pas et que la charge solaire est faible, la lampe se connecte automatiquement au réseau électrique pour continuer à fonctionner à pleine capacité.

**ES**  
Las lámparas solares híbridas se recargan con energía solar durante el día y proporcionan una luz brillante por la noche. En los días nublados, cuando el sol no brilla y la carga solar es baja, la lámpara se conecta automáticamente a la red para seguir funcionando a pleno rendimiento.

**RO**  
Lămpile solare hibride se reîncarcă cu energie solară în timpul zilei și oferă lumină strălucitoare noaptea. În zilele înnorate, când soarele nu strălucește și încărcarea solară este scăzută, lampa se conectează automat la rețea pentru a continua să funcționeze la capacitate maximă.

**PL**  
Hybrydowe lampy solarne ładują się energią słoneczną w ciągu dnia i zapewniają doskonałe światło w nocy. W pochmurne dni, gdy słońce nie świeci, a poziom naładowania jest niski, lampa automatycznie łączy się z siecią, aby kontynuować pracę z pełną wydajnością.

**DE**  
Bei schwacher Solarladung lässt sich die Leuchte in wenigen Stunden über die eingebaute USB-Funktion mühelos aufladen. Das garantiert konstante Lichtleistung und maximale Effizienz.

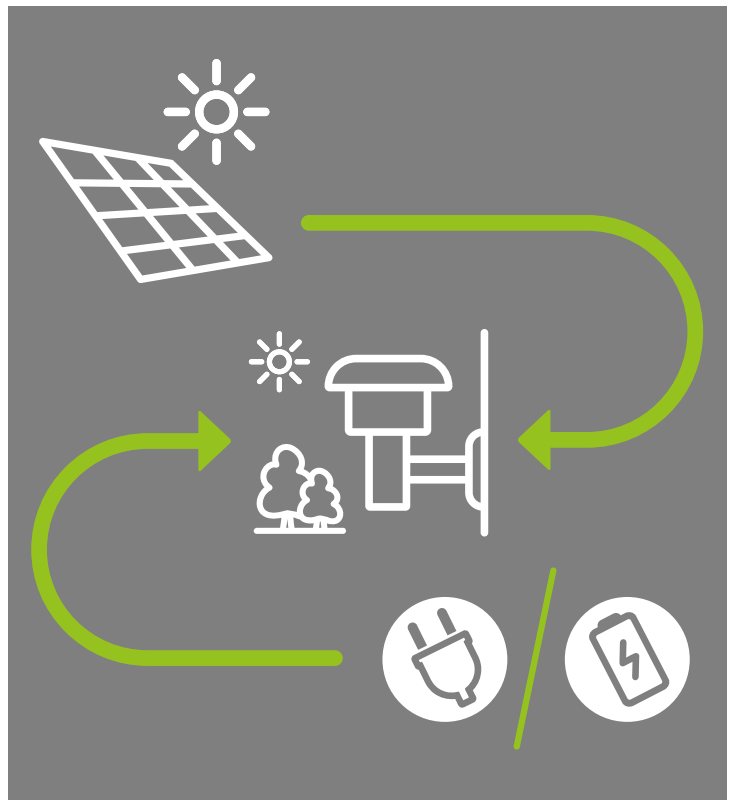

**FR**  
Si la charge solaire est faible, la lampe peut être facilement rechargée en quelques heures grâce à la fonction USB intégrée. Cela garantit une luminosité constante et une efficacité maximale.

**ES**  
Si la carga solar es baja, la luz puede recargarse fácilmente en unas pocas horas mediante la función USB incorporada. Esto garantiza una potencia luminosa constante y la máxima eficiencia.

**RO**  
Dacă încărcarea solară este scăzută, lumina poate fi ușor reîncărcată în doar câteva ore utilizând funcția USB încorporată. Acest lucru garantează o ieșire constantă a luminii și o eficiență maximă.

**PL**  
Jeśli poziom naładowania baterii słonecznej jest niski, lampę można łatwo naładować w ciągu zaledwie kilku godzin za pomocą wbudowanej funkcji USB. Gwarantuje to stały strumień światła i maksymalną wydajność.
